Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1724

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10 and 12-17 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of a sealing element comprising a tongue (16) having an extension in an inclined direction downwards appears to be critical and essential to the practice of the invention, in order to guarantee that all of the water in the container (1) is forced to pass through the filter element (5) [see page 4, lines 6-16 of the specification, especially lines 13-16]. Since this feature has not been recited in claims 10 and 12-17 [claim 17 recites a tongue, but not one having an extension in an inclined direction downwards], these claims are not enabled by the disclosure. *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 12-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. Claims 10 and 12-17 fail to recite the apparently essential limitation that the sealing element comprises a tongue having an extension in an inclined direction downwards; and therefore, these claims fail to particularly point out and distinctly claim the subject matter which Applicant regards as the invention.

Art Unit: 1724

Claims 10 and 12-17 have not been rejected over "art" because it is agreed that the references of record do not teach or fairly suggest a water filter device having an operating rod that is coated with an agent that emits silver ions.

Claim 17 would be allowed if rewritten in independent form, and if further amended to recite that the tongue includes an extension in an inclined direction downwards.
